COURSE BACKGROUND & IMPORTANCE ::

This course is customized for law students to sharpen their legal skills, introducing them to the practical arena of transaction lawyering. Commercial contracts are agreements between the two or more parties. This simple process of formation of contracts is used for each and every simple-complex commercial contracts in every transaction and every legal system. The terms of the contract forms legally enforceable obligations on the parties. There are wide range of general commercial contracts. Private equity (PE) typically refers to investment funds, generally organized as limited partnerships, that buy and restructure companies that are not publicly traded. Private equity is a type of equity and one of the asset classes consisting of equity securities and debt in operating companies that are not publicly traded on a stock exchange. A private-equity investment will generally be made by a private-equity firm, a venture capital firm or an angel investor. Each of these categories of investors has its own set of goals, preferences and investment strategies; however, all provide working capital to a target company to nurture expansion, new-product development, or restructuring of the company's operations, management, or ownership. Common investment strategies in private equity include leveraged buyouts, venture capital, growth capital, distressed investments and mezzanine capital. In a typical leveraged-buyout transaction, a private-equity firm buys majority control of an existing or mature firm. This is distinct from a venture-capital or growth-capital investment, in which the investors (typically venture-capital firms or angel investors) invest in young, growing or emerging companies, and rarely obtain majority control.

Hope to see you here and enjoy practical academics, skilling opportunities and professional guidance of global standards.
